

Project Overview

The proposed platform is a digital job marketplace designed to connect professionals and employers.

The platform will allow:

- Candidates to create profiles, search jobs, and apply
- Employers to register, post job listings, and search candidate profiles
- Admins to verify job postings before they go live
- The website can be easily translated in local language with a click

The goal is to create a centralized hiring platform for professionals, simplifying recruitment and job discovery.

Project Objectives

The platform aims to:

- Provide a simple job discovery experience for professionals
- Enable employers to easily post and manage job listings
- Allow employers to search candidate profiles
- Ensure quality job listings through admin verification
- Provide dashboards for employers and candidates to manage their

activities Additional monetization features:

- Employers can promote job postings as paid advertisements depending on the number of days selected.
-
